

Pinewood®

SCANDINAVIAN OUTDOOR LIFE

AT THE HEART OF REALITY

AUTUMN/WINTER 2022-2023

AT THE HEART OF REALITY

We live as we learn, not a distant brand but instead at the heart of reality. Rooted in Småland, we are a family where everyone belongs. Everything we do is for real, we are one with our consumers. Each seam in each garment is designed with experience, expertise and care, in Värnamo, Sweden.

**Our inspiration comes from
how folks actually do things, not
from how we want them to do.**

We know this. We love this.

[FACEBOOK.COM/PINEWOOD.SV](https://www.facebook.com/pinewood.sv)

[PINEWOODOUTDOOR_OFFICIAL](https://www.instagram.com/pinewoodoutdoor_official)

by folks, for folks

When Pinewood was founded in 1996, we didn't spend many thoughts on marketing. All energy went into developing outdoor gear that we wanted to use ourselves, that became our favorites, and always came with us out into nature. Regardless if it was picking mushrooms, to the fishing lake or the trail. And we kept on like that. Created and grew. Listened to folks, reconsidered, came up with new solutions. Today we are proud of our products. Especially for how they make people feel. So many use Pinewood every day – for the same reason as we do. The freedom of getting into nature.

The care for nature has always been a part of Pinewood – and today more than ever, our attitude toward sustainability affect how we produce, design, ship, package and recycle. The nature we have around the corner means everything.

The aim is that no one should have to think about the garments they wear. Not in the moment. And to wear the right gear is important, if you want to avoid thinking about what you're wearing. The moment is about what sausages to bring to the picnic. The hours in the boat with the kids. Mushrooms where you never could have guessed. Not apparel. And this is why we relentlessly work day in and day out to make sure each detail of Pinewood garments are so good, that you don't even think about it. The best marketing is when you're not thinking about us, but instead of your own experience. When night falls, the sun sinks below the treeline, and the day's adventure is felt in both legs and dimples. That's more than anyone could ask for.

Pinewood. At the heart of reality.

cotton is launched

2020

The first collection entirely made of
recycled polyester is launched

THE LEGACY OF

PINEWOOD

Many outdoor brands have incredible stories about how the founder summited peaks in distant countries or crossed snow-covered mountain ranges with only home-made gear. For us, his name is simply Rainer. And you could say that he founded his brand somewhere along route 153, east of Ullared, Sweden in the autumn of 1994. There he was, on the side of the road, sitting in his rusty '83 Opel Ascona, having just sold his first container of the classic that would become synonymous with his company: the checked Canada shirt. His smile lit up the little green car. The shirts were the last of exactly 8016 pieces that Rainer had brought home from his university friends in Beijing, in two containers over three oceans. But they were the first of what would become Pinewood.

Rainer grew up in the entrepreneurial small town of Gnosjö in Småland. In the forest fifty metres from the house, the expeditions, scout life and the lifelong interest in hunting and outdoor life began. But when his parents separated,

Rainer moved to Taiwan. After a few years in Taipei, he gained a thirst for opportunity, and Rainer started studying Mandarin at the University of Beijing, where some of his closest friends originated from textile families. One day, someone had a suggestion: could he possibly take a couple of containers with lined flannel shirts to Sweden, and see if they would sell there? He could. And he did.

Today, Pinewood has grown from two containers of Canada shirts, to a 170 million SEK business. But while everything has changed, at the same time, nothing has changed. The Canada shirt is still in production. Rainer's attitude is still the same. Being in the real world is still what inspires him. How do you make a jacket so simple, yet still so well-thought-out and good, that it will be the one that always accompanies you out in nature? It's as simple as that.

HOW DID YOUR INTEREST IN NATURE AND OUTDOOR LIFE COME ABOUT?

As a little boy I was a member of the scouts, and early on I developed a great love for the forest and mountains. My mother was a scout leader, so we spent a lot of time outdoors, and this formed the basis for my interest in nature, which is a big part of my everyday life, but also my work.

WHAT IS YOUR BIGGEST LESSON FROM PINEWOOD?

To act in a credible and long-term way in everything you do. It always pays off in the long run.

WHAT DOES THE FUTURE HOLD FOR PINEWOOD?

The future is exciting! During the pandemic, the entire outdoor industry, nationally as well

as internationally, got a huge boost that needs to be nurtured. Many people discovered an outdoor life outside the household, that we are convinced will continue; people will spend more time outdoors than before.

IS THERE ANY TIP YOU WANT TO GIVE OTHERS WHEN IT COMES TO EXPERIENCING NATURE?

To not set the bar too high so that it becomes an obstacle to go outside. A hike doesn't have to take place in the mountains or abroad - we have so much beautiful nature just around the corner, wherever we live. Embrace it and go outside, instead of just planning big trips that may not take place. We took the children out for a hike on Store Mosse here in Småland just a couple of miles from us, and it was so appreciated and so easily accessible... and it happened.

ABISKO INSULATION

A Insulation jacket/vest that is light in weight, soft and comfortable to wear and at the same time incredible at isolating and keeping the warmth in on colder days.

A classic outerwear that's optimal for many occasions. The higher front collar protects the face and neck from the wind and protects from the cold air. Adjustable at the bottom for a perfect fit. There's two front pockets, one chest pocket and an inner pocket all with zippers as well as one open inner pocket. The jackets hood is adjustable but not detachable.

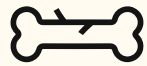

Thermolite® EcoDown T-Down is a sustainable isolating padding material and is made from 100% recycled PET bottles. Every jacket that is isolated with Thermolite® EcoDown T-Down makes it possible to recycle up to 10 PET bottles.

VÄRNAMO PADDED

Wind and waterproof jacket in a longer model, with insulation Thermolite® EcoMade T-Down fiber made from 100% recycled PET bottles. An eco-friendly choice.

Pinewood Värnamo is a winter jacket for the cold days with a soft outer fabric. It is comfortable to wear, isolates and keeps you warm at lower temperatures.

The sealing fabric at the arms end prevents cold air and moist from getting in and the high collar keeps your face and neck warm. Recessed fleece covered collar in the hood.

There is a two-way zip in the front, quick close with magnets, hand warmer pockets, two front pockets, two chest pockets and an inner pocket with zippers.

LAPPLAND FELTED WOOL JACKET

Jacket in a melange look fabric made of 100% wool. The wool is Oeko-Tex® class 1 certified and comes from South America which makes it mulesing free. Wool has very practical qualities: it is self-cleaning and gives warmth

despite being wet. The jacket is provided with TC reinforcements on shoulders and elbows. It has a zipper in the front and two hand pockets with zippers for safe storage.

PINEWOOD.EU

“TENCEL™ is interesting as it is extracted from cellulose and comes from certified forestry, which suits us well as we are a brand that care for the forest. TENCEL™ has many advantages as it feels soft and comfortable against the body and transports moisture, which is important for us as an outdoor brand. TENCEL™ is also produced in a closed system, so compared to viscose it has many advantages from a sustainability perspective, it means that you can recycle the chemicals used and that toxic chemicals aren't released into nature.”

Isabel Turesson

SUSTAINABILITY MANAGER AT PINEWOOD

TENCEL

FROM WOOD TO CLOTHING

Our Nydala Grouse shirt contains TENCEL™. It is soft, easy to care for and has a practical hidden buttoning. It's just as suitable for outdoor activities as for everyday life and is available for both men and women.

TENCEL™ is a sustainable natural material that is kinder to the environment than cotton and viscose and has more superior functions. It is a material with thermoregulation that actively reduces body temperature. TENCEL™ fibres have a high breathability and make the fabric 20% cooler than e.g., wool. The fibres also have a high moisture absorption capacity, the same level as wool, but has a softer and less sticky surface. TENCEL™ is also minimally static. Unlike cotton, polyester, and synthetics, TENCEL™ is a hostile environment for bacteria. The fabric contains nanofibrils that act as a network of canals that conduct moisture away from the surface. When the fibres absorb moisture it makes it difficult for bacteria to grow on the fabric as the fibre surface stays dry during higher activity or humidity. Studies have shown that TENCEL™ fibres reduce odour formation. The fabric was tested with armpit patches during both in- and outdoor training and the difference was noticeable.

TENCEL™ is made from wood from natural forests or sustainable forest plantations. It has gained high reputation for its environmentally responsible manufacturing process that recycles water and reuses the solvent with a recovery rate of 99%. Compared to ordinary lyocell, viscose and cotton, TENCEL™ has the lowest environmental impact, a whole six times lower than cotton.

PASSION FOR FISHING

WE GOT TO SIT DOWN WITH TIMAR MATHIASSEN. TIMAR IS 20 YEARS OLD AND FROM VIMMERBY, SWEDEN, AND IS ONE OF THE LATEST ADDITIONS TO THE PINEWOOD TEAM. TIMAR IS A PROFESSIONAL ANGLER AND HAS FISHED IN OVER 3000 WATERS. HE IS ALSO A PROUD AMBASSADOR FOR PINEWOOD!

WHERE DID YOUR INTEREST IN FISHING COME FROM?

I come from an agricultural family, and I've always spent a lot of time in nature. My dad and grandfather often took me out fishing before I could walk. One of my older brothers used to take me out fishing as well. I was three years old when I fished on my own for the first time, so I had an early interest. When my parents gave up farming, my future in fishing became clearer.

TELL US ABOUT YOUR LIFE JOURNEY!

Even at the age of 13 I knew I wanted to work with fishing, and that's when I decided to attend the Sport Fishing Academy in Värmland, Sweden. At first, my family was a bit sceptical of this because they didn't realize the potential of the fishing business. They thought it was just a hobby for me, but there are actually great educational and working possibilities. My whole life has revolved around fishing ever since school. Every employment I've had, from summer jobs until today, has been in the fishing business. For example, I've worked as a salesman in fishing shops, boat salesman and salmon farmer. Now I work at Pinewood with outdoor and fishing clothes!

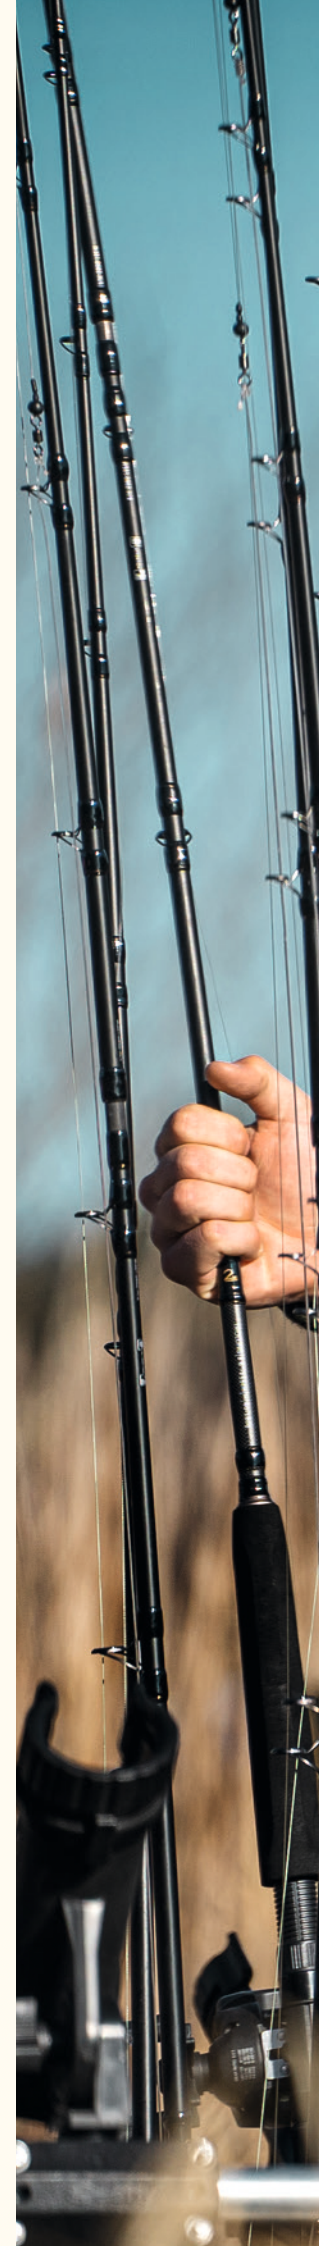

WHAT WAS IT LIKE STUDYING AT THE SPORT FISHING ACADEMY?

It was a really fun time! I studied an extended nature program with focus on sport fishing and

water conservation. I left home when I was 16 years old and lived in a student apartment. It made me value things differently, and I grew as a person during this time. At the academy, all my classmates shared the same big interest in fishing, and it created a special fellowship that I don't think you get in a regular high school. Life revolved around fishing 24/7. Mondays were the most intense day of the week, as everyone would discuss the weekend's fishing trips!

YOU'VE FISHED IN EVERY COUNTY IN SWEDEN - TELL US ABOUT THAT! IS THAT QUITE RARE?

Yes, there are not many people who've done it, and especially not at my age. Last summer I received the trip as a graduation gift from two classmates; we were going to fish in every county in Sweden. We covered all 21 counties in 71 days! We spent about three days in each county and spent the nights in tents, with friends and acquaintances, or in hotels. Most of the time we were welcomed with open arms, but some nights we didn't find any accommodation and had to sleep in the car. When we camped, we cooked the fish we caught over an open fire. We adapted the fishing to each county. In the North of Sweden we fished a lot of trout in mountain lakes, and in the South there was a lot of fishing for pike. In some counties, we only had time to try one fishing spot, while in others we fished in up to five different places.

PINEWOOD® HURRICANE SWEATER MENS ITEM NO 9648 **PINEWOOD® WOOL KNITTED HAT** ITEM NO 1121

PINEWOOD.EU

**FAVOURITE PIECE OF THE
PINWOOD RANGE?**

I've pretty much fallen in love with the Finnveden Hybrid Extreme sets.

YOUR MOST MEMORABLE CATCH?

I've caught Sweden's sixth biggest bass, it weighed 2.7 kg! It was unforgettable.

**IF YOU HAD TO CHOOSE ONLY
ONE SPECIES TO FISH FOR
THE REST OF YOUR LIFE?**

Bass!

**IF YOU WERE TO RECOMMEND
A FISHING LOCATION TO
OUR READERS, WHERE WOULD
THAT BE?**

I would actually recommend you go to your own immediate area and explore what you have near you.

**DO YOU HAVE ANY TIPS FOR
THE EXPERIENCED ANGLER?**

Document everything that happens, it will pay off when you start seeing patterns in the fishing.

**DO YOU HAVE ANY TIPS FOR
THE BEGINNER?**

Learn from people around you; there's no harm in asking! The knowledge is there, just ask for it.

SUSTAINABILITY

WE HAD A SIT-DOWN WITH ISABEL TURESSON - SUSTAINABILITY MANAGER AT PINWOOD. ISABEL LEAD THE IMPORTANT SUSTAINABILITY WORK AT THE COMPANY.

ISABEL, WHO ARE YOU AND WHAT IS YOUR STORY?

I'm 34 years old and live in Gothenburg with my partner. I'm originally from Borås, the textile capital of Sweden, and that's where my interest in clothing began. After high school, I studied a bachelor's degree to become an environmental coordinator. During that time, I became very interested in the textile industry, and after my degree I chose to study a two-year degree to become a quality technician. After that I got an internship that later turned into a job at NA-KD as a purchasing assistant. NA-KD was in a massive development phase during this time. So it was an incredible learning experience. I later moved on to work at the skiwear company, Five Seasons, as a purchasing assistant there, before I started working at Pinewood about 4.5 years ago.

WHAT IS PINWOOD'S VIEW ON SUSTAINABILITY?

Sustainability is very important for Pinewood, in all departments. Early on we joined amfori, the leading global business association for open and sustainable trade. But in the last years we've really intensified our sustainability work. Social awareness is greater today, and the demands from both the EU and consumers have increased as sustainability increasingly becomes a requirement. Sustainability is one of our core values at Pinewood, and we are a company that put words into action. The textile industry constitutes a major environmental issue, and we are well aware of that. We know we aren't perfect, but we do what we can. We want to make good products that make a difference. Timeless design that lasts a long time. We don't want to create fast fashion with "wear and tear" products; for us it's important to have well-thought-out and safe garments. Our aim is to create a garment that will be your favourite in the wardrobe, for many years.

WHAT HAPPENS NOW AND IN THE FUTURE AT PINWOOD WHEN IT COMES TO SUSTAINABILITY?

An important task (and challenge) is to figure out how to move forward with our sustainability work; what materials to choose, which production processes we should use, etc. The work with ChemAct is a big project that constitutes our next step forward, and we're also endeavouring to work with more audited factories. And we're looking at new natural materials, such as hemp, which is made from natural fibres and whose production does not require as much water. For our new autumn and winter collection, we have used e.dye® for the colouring. e.dye® is a waterless dyeing system that is much kinder to the environment than traditional dyeing systems that require water.

WHAT SUSTAINABLE EFFORTS HAVE YOU MADE FOR AUTUMN/WINTER 2022-23?

For Autumn/Winter 2022-23, we use wool in many garments. It's a renewable material with natural properties. We've also started a new collaboration with e.dye and are using that method for many garments in the collection.

WHICH PRODUCTS IN THE PINWOOD RANGE SHOULD YOU RECOMMEND TO SOMEONE WHO IS LOOKING FOR SUSTAINABLE GARMENTS?

Wool, TENCEL™ or e.dye® products. We generally use very durable materials in our clothes, but I would like to push for the Save Water* series, where we use recycled fabric from Pure Waste. In addition to being environmentally friendly, it's incredibly soft and comfortable!

SUSTAINABILITY WORK AT PINWOOD DURING THE COMING YEARS

2022

- Usage of recycled polyester in our TC-Lite and TC-stretch fabrics
- First products to use solution dye, a waterless coloring system through e.dye®
- >80% of our products to be packed in recycled polybags, and packaging sizes to be smaller to avoid waste
- TENCEL™ is incorporated into products

2023

- Biobased polyamides part of the technical outdoor range
- 100% free of plastic parts in our product packaging
- 100% of our products to be packed in recycled environmental polybags

2024

- 100% of polycotton range to use recycled polyester

* Our "Save Water" collection is made of recycled fabric from Pure Waste. This production process uses 99% less water and produces 50% less carbon dioxide emissions than similar fabrics. The products are made from residual fabrics from the textile industry: 60% cotton and 40% recycled polyester. The residual fabrics are sorted by colour, broken down into fibres and spun into a new yarn. This process makes it possible to produce fabrics without a new colouring process and with no usage of new cotton. The fabric is turned into new products in a process that saves huge amounts of water.

INNOVATIONS AND FEATURES

VENTILATION ZIPPER

At high activity level the ventilation zipper is a great cooling function to give you extra air circulation when needed.

ADJUSTABLE LEG ENDINGS

Zippers at the leg endings makes the trousers more flexible. Open the zippers for extra ventilation or to make it easier to put on/off your boots.

COLLAR VENTILATION

High collar with ventilation holes allows you to breath easily during cold or rainy days as you pull up the collar to protect your face. If you wear glasses, the ventilation holes prevent the glasses from fogging up.

ZIPPERS WITH AUTOMATIC STOP

Zippers at your pockets ensure extra safe storage. The automatic stop function is a smart feature, as you must hold the puller in an outward position to open the zipper. This protects against theft and prevents the zipper from being opened unintentionally.

BOOT HOOK

The boot hook is placed at the leg ending and by attaching the hook to the shoelace, you make sure to keep the trousers in place even in tough terrain and high movement.

ZIP-OFF/ GAITERS

With the zip-off function the trousers are suitable just as well on a cold as on a warm day. If you want to protect your legs in tough terrain, you can use the elastic string and wear the zipped off legs as gaiters.

TAPED SEAMS

Taped seams enhance the waterproof protection. In the process of stitching the pieces of fabric together, tiny holes are created, thus leaving a potential entry point for water. Taped seams prevent this from happening.

THIS IS PINEWOOD®

LONG LASTING DURABILITY

By taking good care of your outdoor clothes they not only look better, you can also expect the best performance and a longer lifespan of your beloved outdoor clothes. With some extra care and love on a regular basis you give longer lasting durability to the membranes and coatings of your products.

By creating a long lasting wearable product we minimize the impact on the environment. For us, nature is our driving force and the basis for what we love most of all – an active outdoor life.
